

VIVIEN GRENIER

FULL STACK DEVELOPER

Open to full-time or freelance

PROFILE

Full stack developer with 3 years of experience, specialized in Vue.js / Nuxt and NestJS. I currently build critical medical applications in health tech, where data security and reliability come first.

On the side, I designed, built and shipped Manga Hive on my own: a manga collection tracker available on the web and on Android (Google Play).

SKILLS & EXPERTISE

- Languages: TypeScript, JavaScript
- Frontend: Vue.js, Nuxt, Angular, TailwindCSS
- Backend: Node.js, NestJS, Express, Prisma, REST API, JWT/OAuth
- Databases: PostgreSQL, MySQL, Redis
- Other: Docker, Git, WordPress

STRENGTHS

Self-directed - Product-minded - Pragmatic - Security-conscious

WORK EXPERIENCE

Neuralix - Full Stack Developer

April 2025 - Present

- Develop critical medical applications for thousands of practitioners and tens of thousands of patient records (Angular, NestJS, PostgreSQL).
- Strengthen the backend by redesigning and centralizing business rules on the server side, ensuring data security, reliability and consistency.
- Implement automated tests to validate critical features and ensure system robustness.
- Automate paper-based tests (data collection and scoring), saving practitioners 1.5 hours per patient.
- Take part in technical decisions and write functional specifications, working closely with the team.

SpinforEat - Front-End Developer

MABIS (SpinforEat startup) - (August 2022 - December 2023)

- Developed two single-page applications with Vue 3 (Composition API, Pinia).
- Built a Nuxt.js showcase website for a restaurant, with a focus on accessibility, SEO and user experience.

PERSONAL PROJECTS

Manga Hive: www.manga-hive.com

[Android app on Google Play](#)

In development since 2024, launched in 2026 - Manga library management platform built on a full stack architecture:

- Backend in NestJS + Prisma + PostgreSQL, with JWT and OAuth (Google) authentication.
- Frontend in Nuxt 4 + TailwindCSS + custom UI components, with state management via Pinia.
- Own API and catalog of French editions (~5,000 series, 34,000+ volumes, no third-party API); release calendar, tracking, badges.
- Dedicated Android app on Google Play: offline library, release reminders and sync with the web platform.
- Self-hosted CI/CD pipeline (Coolify, Docker, GitHub): preview and production deployments on a VPS, Redis cache.

EDUCATION

OpenClassrooms - Web Developer

State-recognized "Web Developer" diploma (RNCP 5) - 2022

Project-based program: building websites and web applications (HTML, CSS, JavaScript, Vue, React).

INTERESTS & HOBBIES

- Running AI locally (image and text generation).
- Mockup and UI design in Figma.
- Manga and science-fiction culture.
